DELFT DESIGN DRAWING

Tekenonderwijs IO/IDE

Computer Sketching
ID5272

ECTS: 3
duration: 7 weeks
4 contact hrs/week

use the digital medium for expressing different materials

practice with digital tablet & pen

General info
Design firms and departments mostly deal with sketches, drawings and presentations in a hybrid way: the analogue medium of paper, pen(-cil) and marker integrated with the digital medium of sketches in Painter, Sketchbook Pro or Photoshop.

Course Content
When running the course Computer sketching, students execute all process and drawings steps on a digital canvas, using an available (Wacom) drawing tablet and Corel Painter software. Students learn how to apply efficient steps: to start with fast line sketches, then transfer the line drawing into volumes by adding large brush effects, before turning to details. This course prepares students for working in design practice, and builds on prior knowledge and skills of analogue drawing and visualization.

learn how to integrate photos and sketches

build from simple sketches to elaborate products
